SitaWare Aspire

SitaWare Aspire is a digital training platform that provides you realistic, hands-on experience working with the SitaWare suite, enabling you to unleash the full potential of your SitaWare solution.

We will bring our current version of SitaWare Aspire for self paced individual training.

We will talk about where we see SitaWare Aspire in the future for Role based and Collective Training.

How we see SitaWare being the training platform from individual soldier to Staff and Unit training.

SitaWare Aspire Simulation

SitaWare Aspire Simulation is a Simulation Gateway that provides a much closer integration between many different simulation tools and the SitaWare suite

We will talk about how we see SitaWare Aspire Simulation as the next step on the SitaWare training journey regard to offering the best training solution for Simulation in a Command & Control context.

How we see SitaWare Aspire Simulation closely connected to Simulation tools to archive a realistic collective training environment for staff and unit training.
